

## TABLE OF CONTENTS

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Petrophysics	1
1.2	Petroleum Reservoir Rocks	1
1.3	Mineral Constituents of Rocks—A Review	2
1.4	Rocks	2
1.4.1	Igneous Rocks	2
1.4.2	Metamorphic Rocks	2
1.4.3	Sedimentary Rocks	2
1.5	Classification of Sedimentary Rocks	3
1.5.1	Clastic Sedimentary Rocks	3
1.5.2	Chemical Sedimentary Rocks	5
1.5.3	Organic Sedimentary Rocks	5
1.6	Distribution of Sedimentary Rock Types	5
1.7	Sandstone Reservoirs (Clastic Sedimentary Rock)	5
1.7.1	Pore Space	5
1.7.2	Compaction and Cementation	6
1.7.3	Classification	7
1.8	Carbonate Reservoirs (Limestones and Dolomites)	7
1.8.1	Classification	8
1.8.2	Pore Space	10
1.9	Fractured Reservoirs	11
1.10	Reservoir Column	12
<b>2</b>	<b>Porosity and Fluid Saturations</b>	<b>15</b>
2.1	Definition of Porosity	15
2.2	Factors Affecting Sandstone Porosity	15
2.3	Factors Affecting Carbonate Porosity	16
2.4	Typical Reservoir Porosity Values	17
2.5	Laboratory Measurement of Porosity	17
2.5.1	Direct Porosity Measurement by Routine Core Analysis	17
2.5.2	Indirect Porosity Measurement by CT Imaging	19
2.6	Fluid Saturations	20
2.7	Indirect Porosity Measurement from Well Logs	23
2.7.1	Introduction to Well Logging	23
2.7.2	Mud Filtrate Invasion	24
2.7.3	Porosity Logs	26
	Density Log	26
	Sonic Log (Acoustic Log)	29
	Neutron Log	30
	Combination Porosity Logs	32
2.7.4	Resistivity Logs	32
	Electric Log	34
	Induction-Electric Log	35
	Dual Induction Laterolog	37
	Focused Electric Log (Guard and Laterolog)	37
	Microresistivity Logs	39

2.7.5	Lithology Logs .....	40
	Spontaneous Potential Log (SP) .....	40
	The Gamma Ray Log (GR) .....	41
2.7.6	Nuclear Magnetic Resonance (NMR) Logs.....	43
	Nuclear Spins in a Magnetic Field .....	43
	The Effect of Radiofrequency Pulses—Resonance Absorption .....	44
	Relaxation Processes.....	44
	Molecular Diffusion Effect.....	46
	NMR Signal and Corresponding $T_2$ Spectrum.....	46
	Pore Size Distribution.....	48
	Estimation of Permeability from NMR Relaxation Times.....	49
2.7.7	NMR Imaging of Laboratory Cores .....	50
	The Effect of Magnetic Field Gradients .....	50
	Slice-Selective Excitation .....	50
	Frequency Encoding.....	51
	Phase Encoding .....	52
	Image Reconstruction.....	52
	Three-Dimensional NMR Imaging.....	53
	Signal-to-Noise Ratio and Image Contrast .....	53
	Example NMR Images of Laboratory Cores.....	54
2.7.8	A Comparison of Various Porosity Measurements for Shaly Sand.....	55
2.8	Averaging Porosity and Water Saturation Data.....	55
2.9	Reserve Estimation Project.....	56
2.9.1	Reserve Estimation .....	56
2.9.2	Economic Evaluation .....	57
2.9.3	Simulation Procedure .....	57
2.9.4	Sampling Procedure .....	57
2.9.5	Simulation Output.....	60
2.10	Pore Volume Compressibility .....	62
<b>3</b>	<b>Permeability.....</b>	<b>73</b>
3.1	Definition.....	73
3.2	Dimensions and Units of Permeability .....	75
3.3	Laboratory Determination of Permeability .....	75
3.4	Field Determination of Permeability.....	79
3.4.1	Diffusivity Equation for Slightly Compressible Liquid .....	79
3.4.2	Pressure Drawdown Equation.....	81
3.4.3	Pressure Buildup Equation.....	81
3.4.4	Diagnostic Plots.....	82
3.4.5	Skin Factor .....	85
3.4.6	Homogeneous Reservoir Model with Wellbore Storage and Skin.....	86
3.4.7	Type Curve Matching .....	88
3.4.8	Radius of Investigation of a Welltest .....	89
3.4.9	Field Example of a Welltest Analysis .....	89
3.4.10	Welltest Model for Dry Gas Reservoir.....	96
3.5	Factors Affecting Permeability.....	97
3.5.1	Compaction .....	97
3.5.2	Pore Size (Grain Size) .....	97
3.5.3	Sorting.....	100
3.5.4	Cementation .....	100
3.5.5	Layering.....	100
3.5.6	Clay swelling.....	100

3.6	Typical Reservoir Permeability Values .....	100
3.7	Permeability–Porosity Correlations. ....	100
3.8	Capillary Tube Models of Porous Media. ....	103
3.8.1	Carman-Kozeny Equation .....	103
3.8.2	Tortuosity .....	105
3.8.3	Calculation of Permeability from Pore Size Distribution .....	107
3.9	Steady State Flow Through Fractures .....	109
3.10	Averaging Permeability Data .....	109
3.11	Darcy’s Law for Inclined Flow .....	111
3.12	Validity of Darcy’s Law .....	115
3.13	Non-Darcy Flow .....	116
3.14	Darcy’s Law for Anisotropic Porous Media .....	117
3.14.1	Definition of Homogeneity and Anisotropy .....	117
3.14.2	Darcy’s Law for Homogeneous and Anisotropic Medium .....	118
3.14.3	Transformation of Permeability Tensor from one Coordinate System to Another. ....	121
3.14.4	Alternative Calculation of the Principal Values and the Principal Axes of the Permeability Anisotropy .....	124
3.14.5	Directional Permeability .....	125
3.14.6	Measurement of Transverse Permeability of a Cylindrical Core. ....	129
3.15	Example Applications of Permeability .....	130
3.15.1	Productivity of a Horizontal Well .....	130
	Introduction .....	130
	Homogeneous and Isotropic Reservoirs .....	130
	Homogeneous and Anisotropic Reservoirs .....	132
3.15.2	Productivity of a Vertically Fractured Well .....	134
<b>4</b>	<b>Heterogeneity and Geostatistics .....</b>	<b>151</b>
4.1	Introduction. ....	151
4.2	Measures of Central Tendency and Variability (Heterogeneity). ....	151
4.2.1	Measures of Central Tendency .....	151
	Mean .....	151
	Geometric Mean .....	152
	Median .....	152
	Mode .....	152
4.2.2	Measures of Variability (Heterogeneity or Spread) .....	152
	Variance .....	152
	Dykstra-Parsons Coefficient of Variation .....	152
	Lorenz Coefficient .....	152
4.3	Measures of Spatial Continuity .....	155
4.3.1	Variogram. ....	155
	Definition .....	155
	How to Calculate the Variogram .....	156
	Physical Meaning of the Variogram .....	159
	Variogram Models. ....	160
	Fitting a Theoretical Variogram Model to an Experimental Variogram .....	162
	Variogram Anisotropy .....	164
	Example Experimental Variograms .....	165
4.3.2	Covariance (Autocovariance) Function. ....	166
	Definition .....	166
	Physical Meaning of Covariance Function .....	167
4.3.3	Correlation Coefficient Function (Autocorrelation Function). ....	168
	Definition .....	168

4.4	Probability Distributions . . . . .	169
4.4.1	Normal (Gaussian) Distribution . . . . .	169
	Generation of Random Deviates from a Normal (Gaussian) Distribution . . . . .	171
4.4.2	Log Normal Distribution . . . . .	173
4.5	Estimation . . . . .	173
4.5.1	Introduction . . . . .	173
4.5.2	Ordinary Kriging Equations . . . . .	178
	Derivation in Terms of the Covariance Function . . . . .	179
	Derivation in Terms of the Variogram . . . . .	181
	Solution of the Kriging Equations in Terms of the Covariance Function . . . . .	182
	Solution of the Kriging Equations in Terms of the Variogram . . . . .	183
4.6	Conditional Simulation . . . . .	193
4.6.1	Introduction . . . . .	193
4.6.2	Sequential Gaussian Simulation . . . . .	193
4.6.3	A Practical Application of Sequential Gaussian Simulation . . . . .	195

**A A Systematic Approach to Dimensional Analysis . . . . . 211**

	Summary . . . . .	211
	Introduction . . . . .	211
	Algebraic Theory of Dimensional Analysis . . . . .	211
	Transformations of the Dimensionless $\pi$ Groups . . . . .	213
	Example Problem . . . . .	214
	Procedure . . . . .	214
	Step 1 . . . . .	214
	Step 2 . . . . .	214
	Step 3 . . . . .	214
	Step 4 . . . . .	214
	Step 3 (revised) . . . . .	214
	Step 4 (revised) . . . . .	215
	Step 5 . . . . .	216
	Transformations of the Dimensionless $\pi$ Groups for Example Problem . . . . .	217
	Some Practical Considerations . . . . .	219
	Concluding Remarks . . . . .	220
	Index . . . . .	221
	About the Author . . . . .	229
