

TABLE OF CONTENTS

5	Dispersion in Porous Media	1
5.1	Introduction	1
5.2	Laboratory First-Contact Miscible Displacements	1
5.3	Origins of Dispersion in Porous Media	7
5.3.1	Molecular Diffusion	7
5.3.2	Mechanical Dispersion	7
5.4	Convection-Dispersion Equation	8
5.4.1	Generalized Equation in Vector Notation	8
5.4.2	One-Dimensional Convection-Dispersion Equation	8
5.4.3	Solution of the One-Dimensional Convection-Dispersion Equation	9
5.5	Dispersion Coefficient and Dispersivity	15
5.6	Measurement of Dispersion Coefficient and Dispersivity	19
5.6.1	Traditional Laboratory Method with Breakthrough Curve	19
5.6.2	Laboratory Method of Peters et al. (1996)	20
5.6.3	Field Measurement of Dispersion Coefficient and Dispersivity	24
5.7	Factors Affecting Dispersion Coefficient	27
5.8	Numerical Modeling of First-Contact Miscible Displacement	27
5.8.1	Introduction	27
5.8.2	Mathematical Model of First-Contact Miscible Displacement	27
5.8.3	Numerical Modeling of Laboratory Experiments	28
	Experiment 1	29
	Experiment 2	31
	Experiment 3	32
	Experiment 4	35
	Experiment 5	37
	Experiment 6	38
6	Interfacial Phenomena and Wettability	43
6.1	Introduction	43
6.2	Surface and Interfacial Tensions	43
6.2.1	Surface Tension	43
6.2.2	Interfacial Tension	47
6.2.3	Measurements of Surface and Interfacial Tensions	50
	Capillary Rise Experiment	50
	Drop Weight Method	51
	Pendant Drop Method	52
	Ring Method	52
	Spinning Drop Method	53
6.3	Wettability	54
6.3.1	Definition	54
6.3.2	Determination of Wettability	55
	Contact Angle Method	55
	Amott Wettability Test	56
	United States Bureau of Mines (USBM) Wettability Index	57
6.3.3	Wettability of Petroleum Reservoirs	57
6.3.4	Effect of Wettability on Rock-Fluid Interactions	59
	Microscopic Fluid Distribution at the Pore Scale	59
	Effect of Wettability on Irreducible Water Saturation	60
	Effect of Wettability on Electrical Properties of Rocks	60
	Effect of Wettability on the Efficiency of an Immiscible Displacement	61

6.4	Thermodynamics of Interfaces	65
6.4.1	Characterization of Interfacial Tension as Specific Surface Free Energy	65
6.4.2	Characterization of Microscopic Pore-Level Fluid Displacements	66
	Case 1. Displacement of a Nonwetting Phase by a Wetting Phase	66
	Case 2. Displacement of a Wetting Phase by a Nonwetting Phase	67
7	Capillary Pressure	71
7.1	Definition of Capillary Pressure	71
7.2	Capillary Pressure—Saturation Relationship for a Porous Medium	73
7.3	Drainage Capillary Pressure Curve	77
7.4	Conversion of Laboratory Capillary Pressure Data to Reservoir Conditions	79
7.5	Averaging Capillary Pressure Data	79
7.6	Determination of the Initial Static Reservoir Fluid Saturations by Use of Drainage Capillary Pressure Curve	82
7.7	Capillary Pressure Hysteresis	88
7.8	Capillary Imbibition	91
7.9	Capillary End Effect in a Laboratory Core	92
7.9.1	Capillary End Effect	92
7.9.2	Mathematical Analysis of Capillary End Effect	93
7.9.3	Mathematical Model of Capillary End Effect During Steady State Relative Permeability Measurement	96
7.9.4	Experimental Evidence of Capillary End Effect	96
7.10	Capillary Pressure Measurements	100
7.10.1	Restored State Method (Porous Plate Method)	100
7.10.2	Mercury Injection Method	100
7.10.3	Centrifuge Method	101
7.11	Pore Size Distribution	107
7.11.1	Introduction	107
7.11.2	Pore Volume Distribution	107
7.11.3	Pore Size Distribution Based on Bundle of Capillary Tubes Model	109
7.11.4	Mercury Injection Porosimeter	115
7.12	Calculation of Permeability from Drainage Capillary Pressure Curve	116
7.12.1	Calculation of Absolute Permeability from Drainage Capillary Pressure Curve	116
7.12.2	Calculation of Relative Permeabilities from Drainage Capillary Pressure Curve	122
7.13	Empirical Capillary Pressure Models	122
7.13.1	Brooks-Corey Capillary Pressure Models	122
7.13.2	van Genuchten Capillary Pressure Model	126
7.14	Capillary Trapping in Porous Media	127
7.14.1	Pore Doublet Model of Capillary Trapping	127
7.14.2	Snap-Off Model of Capillary Trapping	129
7.14.3	Mobilization of Residual Nonwetting Phase	130
7.14.4	Oil Migration	131
7.15	Effects of Wettability and Interfacial Tension on Capillary Pressure Curves	132
8	Relative Permeability	151
8.1	Definition of Relative Permeability	151
8.2	Laboratory Measurement of Two-Phase Relative Permeabilities by the Steady State Method	153

8.3	Theory of One-Dimensional Immiscible Displacement in a Porous Medium	156
8.3.1	Mathematical Model of Two-Phase Immiscible Displacement	156
8.3.2	Buckley-Leverett Approximate Solution of the Immiscible Displacement Equation.	158
8.3.3	Waterflood Performance Calculations from Buckley-Leverett Theory	161
	Oil Recovery at any Time.	161
	Oil Recovery Before Water Breakthrough.	161
	Oil Recovery at Water Breakthrough.	162
	Oil Recovery After Water Breakthrough.	163
	Water Production	165
8.4	Laboratory Measurement of Two-Phase Relative Permeabilities by the Unsteady State Method	170
8.5	Factors Affecting Relative Permeabilities	177
8.5.1	Fluid Saturation	177
8.5.2	Fluid Saturation History.	177
8.5.3	Wettability	177
8.5.4	Injection Rate	179
8.5.5	Viscosity Ratio	180
8.5.6	Interfacial Tension.	180
8.5.7	Pore Structure	180
8.5.8	Temperature	181
8.5.9	Heterogeneity	181
8.6	Three-Phase Relative Permeabilities	182
8.7	Calculation of Relative Permeabilities from Drainage Capillary Pressure Curve	183
B	Integrated Petrophysical Analysis	211
	Introduction.	211
	Project 1	211
	Project 2	244
	Project 3	244
	Project 4	244
	Project 5	246
	Project 6	249
	Project 7	251
	Project 8	253
	Project 9	253
	Project 10	254
	Project 11	254
	Project 12	255
	Project 13	256
	Index	259
